

Amendments to the Specification:

Please replace the paragraph beginning at page 1, line 13,  
as with the following amended paragraph:

US patent ~~number~~ number 6,188,933, issued  
February 13, 2001, describes a stage lighting system which  
operates based on computer-provided commands to form special  
effects. One of those effects is control of the shape of a  
light pattern that is transmitted by the device. This control  
is carried out on a pixel-by-pixel basis, hence referred to in  
this specification as pixilated. Control is also carried out  
using an x-y controllable device. The embodiment describes  
using a digital mirror device, but other x-y controllable  
devices such as a grating light valve, are also contemplated.
